Summary

As the Founder of Synaptiq Consulting, I lead consulting initiatives
in IT and automation, specializing in AI systems and software
solutions. Our mission is to connect human potential with cutting-
edge technology, bridging strategic needs with tailored tools to drive
success.
As an AI Engineer on Upwork, I simultaneously collaborate with
clients to design and deploy custom AI models utilizing advanced
machine learning techniques. Backed by certifications in Data
Science and Generative AI, I aim to deliver scalable solutions that
align with business goals and foster innovation.

Experience

Synaptiq Consulting
Founder
June 2025 - Present (5 months)
Nice, Provence-Alpes-Côte d'Azur, France

Consulting in IT and automation (AI) systems and software. Sales of
associated IT solutions, software, and hardware. Beyond this dual expertise,
Synaptiq Consulting's mission is to create the connections for your success.
We believe that performance is born from connection: the connection between
an idea and its realization, between a problem and its solution, between
human potential and the power of technology. Inspired by the synapse, which
transmits information to the heart of our brain, we act as a bridge between
consulting and technology:

We connect our expertise to your needs through a strategic consulting phase,
where we analyze and define the best roadmap together. We connect your
strategy to the best tools by offering you software solutions and AI systems
designed for seamless integration and maximum efficiency.

Whether you are a company looking to create a competitive advantage or
an individual wishing to optimize their daily life, Synaptiq Consulting is the

partner that weaves the network of your success. Synaptiq Consulting. The intelligence that connects you to tomorrow.

Upwork
AI Engineer
February 2023 - Present (2 years 9 months)
Nice, Provence-Alpes-Côte d'Azur, France

Operating as a dedicated AI Engineer for clients on Upwork, I leverage cutting-edge machine learning and data science techniques to transform business objectives into tangible technological realities. My work encompasses the full project lifecycle, from initial data exploration and feature engineering to building, training, and deploying robust models in production environments.

I specialize in crafting bespoke solutions that empower businesses to innovate and gain a competitive edge. By collaborating closely with stakeholders, I ensure that each AI-driven solution is not just technically sound but is also perfectly aligned with strategic goals, delivering intelligent systems that are built for impact and scale.
